- 1 with Bonnie?
- 2 A. A wonderful partnership. Bonnie's my best 3 friend, has been throughout our marriage.
- 4 Q. I take it, she's the only wife you've ever 5 had.
- 6 A. Yes, sir.

7

- Q. Do you and Bonnie have children?
- A. We have three sons. 8
- 9 Q. What are their names and ages, Dr. Prouty?
- 10 A. Steve is 42, lives in Massachusetts; Danny 11
- 41 and lives in Corpus Christi; and David is 39 and 12 lives in Houston, Texas. 13
 - Q. All right. And do you have any grandkids?
- A. Yes, we have five grandchildren. We have 14 three in Massachusetts, two boys and a girl; and we 15 16 have two in Houston, a boy and a girl.
- 17 Q. And do you see your grandkids regularly, 18 Dr. Prouty?
- 19 A. Yes, we do.
- 20 Q. Does that include the ones in Massachusetts?
- 21 A. Well, we don't see them as frequently, of
- 22 course, as we do the ones in Houston. But we take
- turns flying them down here from Massachusetts so we 23
- 24 can spend time with each one individually. We do
- 25 that every year.

A. I was born in Detroit, Michigan in 1933. Q. Where were you raised?

A. My early life in Detroit. And then, when I was seven years old, we moved to Dearborn, Michigan.

Q. And did you attend grade school and high school in Dearborn?

A. Yes. I went through the Dearborn public school system.

Q. What were the names of the schools you attended?

11 A. The elementary school was called the Charles 12 A. Lindbergh School, and the high school was called 13 Dearborn High School.

14 Q. And from there, where did you continue on to 15 get your education that allowed you to become a 16 veterinarian?

A. In 1951, I commenced attending Michigan State University. And I stayed there and got a bachelor's degree and my doctor of veterinary medicine degree there. That was in 1957.

21 Q. All right, sir. What was your father's 22 name?

A. Same as mine, Dayton L. Prouty.

Q. And for most of your life growing up in Detroit and Dearborn, what did your father do,

Page 13

- Q. And give an example of the kinds of things you do when you fly one of your grandkids down here to Texas.
- A. Well, this year we flew our oldest grandson down so that he could spend -- he came down the day after Christmas and stayed until after New Year's with us.

In the summertime, our eight-year-old granddaughter, we flew her down. And I couldn't spend a lot of time with her because of my health. but this had been planned before I got sick. And we were able to spend some quality time with her.

In the summer of '98, Andrew was ten years old at that time and we flew him down and we took him on a camping trip in the mountains of New Mexico and spent a week trout fishing with him.

- 17 Q. Has that time been important to you in your 18 life, Dr. Prouty?
- 19 A. It's been extremely important. It's quality 20 time.
- 21 Q. Sounds like you have a pretty close family, 22
 - A. We have a very close family.
- Q. Let's talk about your background, sir.
 - When and where were you born?

Dr. Prouty?

A. Most of that time he worked for the Universal Zonolite Company in Detroit and Dearborn.

Q. What did he do for Universal Zonolite Company in Detroit and Dearborn?

A. He was the general manager in -- of the Dearborn -- Detroit and Dearborn plants; and then, he became a regional manager for Universal Zonolite that included some other factories.

Q. And can you tell the jury what exactly the 11 Universal Zonolite Company, or as it's later known, the Zonolite Company, was.

A. Yes. It's a -- a company that manufactures building materials and supplies from a mineral called vermiculite. It's used primarily for insulation purposes.

Q. What is vermicul- -- vermiculite? MR. SMITH: Objection, form.

A. Vermiculite is a mineral that's mined, that is mica-like in that it has multiple thin layers. It's different from mica in that it has water

molecules entrapped in it, so that when it's put into a high-temperature furnace the water molecules expand

24 into a -- a gas of water vapor and expands the vermiculite several times so that it has insulating

- qualities to it.
- Q. That process you described about heating up the vermiculite and expanding it, was that a significant part of the business of the Universal
- 5 Zonolite Company or the plants that your father 6 managed?
 - A. Yes, it was significant.
 - Q. Starting at an early age, were there occasions when you went with your father to his place of work in Detroit and later, Dearborn?
- A. Oh, yes, frequently I would go with him to 11 work on Saturday mornings. 12
- 13 Q. Okay. Well, tell the jury a little but about that, how would that come about and how 15 frequently would you do it and what would you do when 16 you were there.
- 17 A. Well, I would frequently go once or twice a 18 month on Saturday mornings; and while he worked in 19 the office, I would play around in the plant and the 20
- 21 Q. All right. You mentioned the plant. Can 22 you give the jury a little bit of an idea what the plant was like at these Zonolite facilities in 23 Detroit and Dearborn. 24
 - A. Well, the plant would consist of bins where

A. Well, I was the youngest, and therefore low man on the totem pole. So, I was a common laborer

- 3 and had a lot of janitorial duties. And then, I 4 would fill in wherever they needed somebody, whether
- 5 it was bagging certain of the products or loading 6 tractor trailers or loading boxcars with the bagged 7 finished products.
 - Q. And you did all of those things, basically?
 - A. Yes.
 - Q. Can you describe for the jury what the conditions were like in these different Zonolite facilities, including the ones you visited as a child and the ones you worked in as a teenager.
 - A. Well, --

MR. SMITH: Objection, form.

- 16 A. -- all of them -- Overwhelming adjective 17 that describes them to me is dusty. The most dusty 18 places I've ever been in.
- 19 Q. (BY MR. KRAUS) How dusty was it? Can you 20 give the jury some examples of how dusty it was in 21 these Zonolite plants.
 - A. Well, yes. At any given time on any horizontal surface, if you'd rub your finger towards the edge of a table, there would be a little waterfall of dust going down the -- The floors would

Page 15

Page 17

- the raw vermiculite ore, unprocessed ore, was kept. And then, it would also consist of furnace areas
- 2 3 where the expansion of the product would occur. And
- then, it would also consist of the bagging area where
- the finished product would be put into large paper 5 bags, and then there would be warehouse areas. And
- 7 then, there would be train track areas, where trains
- 8 would come in with the raw ore and depart with the 9 finished product.
- 10 Q. And was it a regular occurrence during your 11 childhood for you to make these trips to the factory or the plant with your father on Saturdays? 12
 - A. Yes, it was a common occurrence.
- 14 Q. All right, sir. When you turned 14 years 15 old, did there come a time when you, yourself, became 16 an employee of what was then the Universal Zonolite 17 Company?
- 18 A. Yes. On -- When I turned 14, they allowed 19 me to come to the Zonolite plant and work on weekends 20 until summer. And then, I worked full time in the
- 21 summers from the time I was 14 until I went away to 22 college in 1951.
- 23 Q. When you became an employee at the plant, 24 what were your duties and where did you work in the 25 factory?

- 1 leave tracks when you walked, it would be so dusty.
 - Q. And I've -- I've mentioned multiple facilities. How many different facilities --Zonolite facilities or -- or locations did Zonolite have in the Detroit and Dearborn area during this period of time from your childhood through high
 - school? A. There were three different facilities.
- 9 Q. And the one you worked in was where?
- 10 A. That was the Dearborn facility north of Ford 11 Road.
 - Q. In terms of the dustiness, was there any significant difference in the dustiness in the three different Zonolite facilities that you were in?
 - A. I don't recall that there was a difference. They were all very dusty.
- 17 Q. And on the occasions when you were in the 18 plant, before you were an employee, when you were 19 there as your father's guest, I guess, for want of a 20 better word, were you welcome in the facility, to 21 your knowledge?
- 22 A. I pretty much had free run of the facility.
- 23 Q. You weren't trespassing or anything when you 24 were in there?
 - A. No. I -- I was, of course, invited to go

(Pages 14 to 17)

800-753-2556

23

24

A. Well, they're one and the same. The vermiculite is the product that comes as raw material to the plant. It contains asbestos. And as it's expanded and put into bags, the finished product also contains asbestos.

Q. Now, among the duties that you had when you were an employee at the Dearborn plant, did you have occasion to actually handle bags of raw asbestos separate from the vermiculite?

A. On many occasions I did.

Q. Okay. Explain how that came about for the jury, please.

A. One of the products that Zonolite Company manufactured and sold was called Zonolite high temperature cement. And I participated in the manufacturing of that, which involved pouring the vermiculite product, Portland cement and bags of raw asbestos fibers into a mixer, which then went into a hopper and was put into bags as the finished

product. Q. What were the conditions like when you were assisting in the mixing of Zonolite high temperature

A. -- Flintkote.

Page 22

What was the condition of your father's clothes, the suits he wore to work, when he came home from the plant at the end of the day?

- A. They were always dusty.
- Q. Do you believe -- Strike that.

Were you in a position to be exposed to dust on your father's clothes at the house after he came home from work?

MR. SMITH: Objection, form.

- 10 A. Yes, very definitely.
- 11 Q. (BY MR. KRAUS) Did you breathe dust from your father's clothes? 12
 - A. Had to have, yes.
- 14 Q. On few or many occasions?
 - A. Daily.
- O. Now, the -- the equipment and machinery in 16 17 the plant, was there other -- was there insulation on the high temperature equipment in the plant? 18

DEFENDANT: Objection, form, leading.

- 20 A. There were pipes that were covered with 21 insulating material.
- 22 Q. (BY MR. KRAUS) Can you describe what those
- pipes looked like and what the material looked like? 23
- 24 A. Well, the -- the material that insulated
- them was in two halves that would fit together over 25

Page 24

- 1 A. Well, the -- the bricks would be taken out 2 and the old mortar taken out; and then, the bricks 3 would be reused, and it would be remortared and put 4
 - Q. (BY MR. KRAUS) With respect to dust, what were the conditions like when the furnaces were being re-lined at the Zonolite plants?

MR. ESPINO: Objection, form.

- A. It was just an additional source of dust, one of many.
- 11Q. (BY MR. KRAUS) Throughout -- And I take it from your testimony, the last time you worked at that 13 plant full time was the summer of 1951.
- 14 A. Yes, that's correct.
- 15 Q. Were there other occasions when you were in 16 that plant after you last worked there?
- 17 A. Oh, yes, on many occasions. When I would 18 come home from college, I would visit my father at 19 the plant. And then, even after I graduated, there 20 were times when I would go to the plant and buy 21 products for my own use in either my home or
- 22 veterinary clinic. 23 Q. That continue throughout the late 1950s?
- 24 A. Yes. It continued --
 - O. In the '60s?

- the length of the pipe. And then, it would be 2 clamped or taped at various places to hold it around 3 the pipe.
 - Q. What were the conditions like when that insulating material was disturbed or hit in any way? MS. LOPEZ: Objection, form.
 - A. The insulating material was always covered with dust.
- 9 Q. (BY MR. KRAUS) All right. And the furnaces 10 that you've mentioned for the expanding of
- vermiculite, did those furnaces have fire boxes? 11
- 12 MR. ESPINO: Objection, form.
- 13 A. Yes, they had fire boxes that were lined 14 with brick; and then, they had big oil-fired blowers 15 that blew into them.
- O. (BY MR. KRAUS) Were there occasions when 16 17 the fire boxes needed to be re-lined?

MR. ESPINO: Objection, form, leading.

- 19 A. Whenever the furnaces were shut down and 20 cooled off; before they could be started up again, 21 they would have to be re-lined.
- O. (BY MR. KRAUS) Can you describe the process 22
- of re-lining one of the vermiculite furnaces for the 23 24 jury?
 - (Mr. Oliveira leaves the depo.)

- 1 A. It continued as long as my father worked 2
 - Q. Okay. Into the '60s then?
 - A. Yes, that's correct.
- 5 Q. When you would go to the plant to visit your 6 father, would you have occasion to go back into the 7 factory part of the plant?
 - A. Oh, yes. Many of the workers that I considered my friends still worked there, and I would always go back and greet them.
- Q. The one occasion where you mentioned where 12 you got products, did you actually go back into the 13 plant and load the products yourself?
 - A. Oh, yes, I did.
 - Q. And what kind of products were they?
- 16 A. Well, there was two that I recall. One of 17 them was bags of house fill insulation. And then, I 18 picked up a product called Z-Brick for decorating one 19 of my waiting rooms.
 - Q. And the house fill, what was the main ingredient of house fill?
- 22 A. Well, it was strictly vermiculite insulation 23 from vermiculite.
- 24 Q. Where did virtually all of the vermiculite used at the Detroit and the Dearborn facilities come

(Pages 22 to 25)

Guyton Reporting Services Page 30 those hazards? 1 2 MR. SMITH: Objection, form. 2 3 A. There's no way he would have allowed me to 3 4 work there. My father and I had a very close, loving 5 relationship. We did many, many things together. 5 There's no way he would have allowed me to work there 6 6 7 if he had known of the health hazards. 7 Q. (BY MR. KRAUS) Now, in addition to your 8 work at the plant, you've actually used 9 asbestos-containing Zonolite products yourself, 10 10 haven't you? 11 11 12 A. Yes, many times. 12 13 Q. Okay. Give the jury some examples of -- of 13 14 times when you've used asbestos-containing Zonolite 14 15 15 16 A. Well, I've used it many times both in home 16 17 remodeling and in clinic remodeling, veterinary 17 18 clinic remodeling, both in Belleville, Michigan and 18 19 in Corpus Christi, Texas. 19 20 Q. Have you used the high temp cement that you 20 21 described? 21 22 A. I used it in my parents' home. When they 22 23 purchased a new hot water heater, I mixed up the

Page 32

Page 33

Q. Let me show you what I've had the Court Reporter mark as -- as Prouty Exhibit 1. And, Dr. Prouty, this is a -- a report from the Montana State Board of Health, entitled "A report on the Industrial Hygiene Survey of the Zonolite Company of Libby, Montana, August 8th and 9th, 1956." And before I hand it to you, I'm going to quote from Page 3 of that report, paragraph entitled, "Toxicity."

"A review of the literature indicates that vermiculite or the dust from this material is not especially toxic and is generally included only

that vermiculite or the dust from this material is not especially toxic and is generally included only as a nuisance dust. However, the asbestos dust in the dust in the air is of considerable toxicity and is a factor in the consideration of reducing dustiness in this plant."

Is that something you would have liked to have known when you were working at the Zonolite facility?

A. I would have loved to have known when I was -- I wouldn't have been working at the Zonolite plant if I would have known that.

Q. Now, this was 1956, this was after you quit working there.

A. That's correct.

Page 31

pipes that went from the hot water heater until they disappeared into the wall.

to insulate the hot water heater and the hot water

Zonolite high temperature cement and padded it around

Q. Is this the same type of Zonolite high temperature cement that you described earlier mixing with asbestos?

A. It's exactly the same products, yes.

24

1

2

3

4

5

6

7

8

9

Q. When you mix a bag of Zonolite high temperature with water to apply, what are the conditions?

10 A. Well, I did it in a bucket. And as you 11 first add the water, it's a -- very dusty and fluffs up. And as -- as you mix it with your hands and add 12 the adequate amount of water, it becomes a 13 14 cement-like slurry that you then -- And it has enough adhesiveness to it that as you pick it up with your 15 hands you can pat it onto a vertical surface and it 16 17 will stick to it.

Q. All right. And the house fill that you mentioned, when you use -- fill up a wall with the house fill insulation in its ordinary way of being used, what are the conditions like when you're working with that product?

A. Well, you pour it out of these big four cubic foot bags. And, of course, it's extremely dusty when you do that.

Q. You were in the plant after 1956; is that correct?

3 A. Many times.

Q. Did you see any change in terms of the health precautions that were taken in the Dearborn plant?

A. I never saw any changes in the dustiness of it.

Q. This report on Page 2 references that in 1944, the last study of the plant was made. Would you have liked to have known that Zonolite was having the Libby, Montana facility studied for dust health hazards as early as 1944 before you went to work for them?

A. I would have liked to have had that information.

Q. And this information in this report was not information that you had when you worked at Zonolite; is that correct?

A. That's correct.

Q. With respect to the reference on Page 2 there to a 1944 report, I'm going to hand you what the Court Reporter marked as Prouty Exhibit 2.

An August 2nd, 1944 letter from

25 Dr. Kilbourne of the Montana Department of Health to

9 (Pages 30 to 33)

PP Obji R

R

800-753-2556

Pag	ρ.	3
r. au		J

Mr. John Meyers of the Universal Zonolite Company in 2 Libby, Montana.

Dr. Kilbourne writes, "I am forwarding you herewith a copy of the report of a recent visit to your mine and mill by the Division of Industrial Hygiene.

It is indeed gratifying to note that you have made such extensive and successful efforts to control the dust hazards inherent in your operations."

You see? Did I read that correctly,

12 Dr. Prouty?

3

4

5

6

7

9

10

11

13

14

15

16

18

1

2

3

4

5

7

A. Yes, you did.

Q. Would you have liked to have known that there were dust hazards inherent in Zonolite's operations in 1944 and thereafter?

17 A. Yes, I would have.

MR. SMITH: Objection, form.

19 Q. (BY MR. KRAUS) Answer again because of the 20 objection.

21 A. I -- I would liked to have had that

22 information at that time.

23 Q. Were there extensive efforts made to control 24 the dust hazards in the Zonolite facility you worked 25

in in Dearborn?

Page 36

- Q. Would you have liked to have known what Zonolite knew, that as early as 1927 they were aware 2 3 that there was asbestos in the Libby vermiculite?
 - A. I would have liked to have known that.
- 5 Q. All right, sir. I want to shift gears for a 6 minute and talk about some other potential exposures 7 that you had.

8 Now, you're a do-it-yourselfer, aren't

9 you?

4

18

4

5

6

10

11

18

19

23

10 A. Yes.

11 Q. Throughout your life, have you engaged in repairs and remodeling of the homes in the veterinary 12 offices where you worked? 13

14 A. I always did what I could, yes.

15 Q. Have you done jont- -- joint compound work 16 yourself?

17 A. Many times.

Q. Describe briefly for the jury what that is.

19 A. Well, where two pieces of Sheetrock, the

20 drywall come together and there's a crack, you cover

21 it with the joint compound and then you add paper to 22

it and more joint compound. And you let this process

23 dry, and sand it down until it's smooth and very,

very even. And you add more joint compound. You do 24

25 this two or three times, letting it dry and sanding

Page 35

MR. SMITH: Objection, form.

A. I never saw any effort made to control dust production at the Dearborn plant.

Q. (BY MR. KRAUS) I'm going to show you a newspaper article from 1967 from a Montana newspaper. And I'm going to refer you to the

6 beginning, where it says "Editor" -- the -- the

8 headline of this document -- or this article is

9 "Zonolite gets expert opinion, asbestos production

10 useless." And it begins, "Editor's note: The

11 following article and letters appeared in the June 12 30th, 1927 issue of the Flathead Monitor."

13 Where is Flathead? Do you know where

14 that is?

15 A. It's in Montana.

16 Q. Under the headline, quote, says, "Libby 17 asbestos deposit not commercially valuable." And it 18 is an open letter to the shareholders of the Zonolite

19 Company. "So much publicity has recently" -- "has 20 been recently given the occurrence of amphibole

21 asbestos in the Rainy Creek mining district in which 22 our Zonolite deposit is located."

23 Did I read the highlighted portion

24 correctly, Dr. Prouty? 25 A. Yes, you did.

1 it in between until you have a surface that's

cosmetically smooth enough that you can go ahead and 2 3 paint it or wallpaper it.

Q. What are the conditions like when you're sanding the dry joint compound down?

A. It's extremely dusty. You end up white.

7 Q. And what are the conditions like when you're 8 pouring the joint compound in a bucket and mixing it 9 with water?

A. Well, it's very dusty until you get it well mixed with the water.

12 Q. Did you breathe the dust from the joint 13 compounds you used in the '50s and the '60s? 14

MR. OGDEN: Objection, form. A. Undoubtedly every time I used it I had to

15 16 breathe the dust. 17

Q. (BY MR. KRAUS) What years -- what decades do you recall this kind of joint compound work?

A. The '50s, the '60s and '70s.

20 Q. And did you breathe the dust from the joint 21 compounds you used in the 1950s and the 1960s and the 22 1970s?

MR. OGDEN: Objection, form.

24 A. Every time I used it, I breathed the dust. 25

Q. (BY MR. KRAUS) Now, you don't have a

specific recollection of the names on the bags of the 2 joint compound; is that correct?

A. Not for any specific job that I did.

Q. Okay. And tell me the names, the brand names that you associate with the joint compound work you've done over the years.

MR. OGDEN: Objection, form.

8 A. Well, the various brand names that I 9

remember is being ones that I used were EZ Tex. They 10 were U.S. Gypsum and Gold Bond brand.

MR. OGDEN: Objection, nonresponsive.

12 Q. (BY MR. KRAUS) Have you also laid asbestos 13

MR. OGDEN: Objection, form.

15 A. Yes, I have.

Q. (BY MR. KRAUS) Okay. Have you done tiling 16 16

work and flooring work in the remodeling that you've 17 18 done?

6

7

8

9

11

19 A. Yes, I did.

20 Q. Okay. What products do you recall using,

21 what brand names of products do you recall using for

22 the floor tiling work that you did?

23 A. The brand name that I recommend using on

several occasions was Armstrong tile. 24

Q. And do you recall what type of Armstrong

Page 39

Page 41

tile it was? A. They called it Armstrong asbestos floor tile.

MR. OGDEN: Objection, nonresponsive.

Q. (BY MR. KRAUS) Did you actually lay that tile yourself?

A. Yes, I did.

Q. Did you have occasions to cut that tile?

A. Yes.

10 Q. Did you have occasions to saw that tile?

A. Yes.

12 Q. Is there some dust associated with that?

13 A. Some dust.

14 Q. Now, we talked about your graduation from 15 vet school in '57 and -- and -- and your retirement

because of your cancer in '99. Can you briefly

outline for the jury your career as a veterinarian 18

between 1957 and '99.

A. Yes. When I graduated from veterinary 19 20 school in East Lansing, Michigan, we moved to

21 Belleville, Michigan, where we rented a -- living

quarters. And it had a two-car garage next door,

which we were allowed to use and clean out and

remodel it into a small veterinary clinic. And

that's how our practice got started.

3 It had a home, and it had what had been a garage and 4 had been converted into an apartment. And so, we 5 remodeled that apartment facility into a veterinary 6 clinic. 7

facility, and we bought some property in Belleville.

Within about two years we outgrew that

And during the time that we stayed in Belleville, we put additions and enlargements on that veterinary clinic on two different occasions. Developed a very successful practice there.

And in 1972, we sold that practice and moved to a -- a city in Michigan's upper peninsula on the shore of Lake Superior, where I moved into a practice with two other veterinarians there. And we had a veterinary practice that I continued in until 1976.

Q. Now, what's the name of that city where you were from '72 to '76?

A. Marquette, Michigan.

Q. Why did you move up to the upper peninsula? First off, is that up by Canada?

A. Well, yes. It's on the south shore of Lake Superior, and all of the northern shores is Canadian. It's -- it's extremely far north.

Q. Why did you move up there?

A. The main reason was because by 1972 Detroit had undergone such social degradation, in my opinion, that I no longer wanted to raise my children in the environment that we found ourselves in. I wanted to -- to get to a -- a better place to raise my children.

Q. And why did you -- And where did you go when you left Marquette in the upper peninsula in 1976?

A. Well, by that point, we decided we needed to live in a warmer climate and we wanted to be close to water where we could sail, because that had become our hobby. And we picked Corpus Christi, Texas. And when we sold out in Michigan, we moved to Corpus Christi, Texas and developed another small animal practice there.

Q. And you were in your 40s at that time?

A. Yes, I was 43.

18 Q. Did you have any connection at all with 19 Corpus Christi?

A. No, sir, we didn't know a sole there when we moved to Corpus Christi.

Q. That must have been a bit of an adventure?

A. It was a very big adventure. And -- and it turned out to be a very successful adventure.

Q. And you've lived here on the Texas Gulf

11 (Pages 38 to 41)
